PROFILE

Full-stack developer with a front-end focus, I have worked on web products for startups, enterprises, and freelance projects. I handle features end-to-end, from design to back-end, and perform well in dynamic, autonomous environments.

I am currently seeking a final-year internship or a 6-month fixed-term contract, starting between March 1st and May 1st, to build simple, reliable, and user-focused solutions.

WORK EXPERIENCES

FULLSTACK DEVELOPER - LibertAI

September 2025 - Now

Work as a full-stack developer at LibertAI, working across product areas including front-end and UI/UX, back-end features, database design, chat functionality, Telegram bot integration, and design evolution to support the company's decentralized AI platform and applications.

- Implementation and evolution of front-end features for the LibertAI application and marketing site
- Design and maintenance of UI/UX across product interfaces and interaction flows
- Development and integration of back-end functionality, database logic, chat systems, and Telegram bot features for enhanced user engagement

FRONT-END DEVELOPER - Ubisoft

June 2025

Work as a freelance front-end developer for Ubisoft, independently developing the full front-end of an online game experience.

- Solo development of the game's front-end interface
- Integration of interactive and responsive UI components
- Close alignment with gameplay and visual design requirements

FRONT-END DEVELOPER - LibertAI

June - August 2024

Work as a freelance front-end developer at LibertAI, leading a full redesign of both the marketing website and the application interface, while ensuring ongoing design maintenance and iterative improvements.

- Complete redesign of the website and application user interfaces
- Front-end implementation aligned with brand identity and usability best practices
- Ongoing maintenance and evolution of the design system and UI components

FULLSTACK DEVELOPER - SUNVER

March - June 2024

Work as a freelance developer at SUNVER, collaborating closely with the CEO and CTO (co-founders) to build core features of a guest application designed for hotels, Airbnb, and other hospitality providers, while also contributing to product promotion efforts.

- Development of core features for a hospitality-focused guest application
- Close collaboration with the CEO and CTO in a startup environment
- Presentation of the solution to potential partners at Food Hotel Tech 2024

FULLSTACK DEVELOPER - Diabolocom

July to December 2022

Work as a full-stack developer at Diabolocom. Update and maintain the internal "Nautilus" platform using React and TypeScript, while developing a custom web solutions aligned with business and teams needs

- Maintenance and evolution of an internal React/TypeScript application
- Development of a TypeScript-based web callback modal plugin
- Design and implementation of custom technical solutions for internal teams
